For maps and notes

E Large ventilation zips

For optimal temperature regulation

F Sophisticated clip-on straps

For protection against cold and UV rays

“Clothing designed by glider pilots for glider pilots”

Daniel Rossier, three-time Swiss Champion

MILVUS DESIGNED FOR FLYING

PRODUCT INFO GLIDING TROUSERS

FABRIC BREATHABLE & ABRASION RESISTANT

MILVUS gliding trousers are made from light, breathable fabric, making them both comfortable to wear and allowing excellent temperature regulation. The seating area is endowed with abrasion resistant stretch fabric on the outside and fitted with soft, skin friendly fabric on the inside. Their grey tone prevents unwanted reflection on the cockpit canopy. The trousers are made from 97% nylon and 3% elastane.

CUT ERGONOMIC & DESIGNED FOR FLYING

The ergonomic shape of the trousers is designed for the reclined flying position of the glider pilot. The legs are a bit longer than for a normal trouser, ensuring that the ankles are covered and thereby protected from the cold or sunrays. The knee areas are anatomically shaped, guaranteeing optimal fit of the trousers.

A Elastic waistband for optimal comfort

B Easy bladder relief thanks to the 25 cm long fly zip

C Quick and easy access to your equipment

D Pouch for notes, checklists and maps

E Ventilation for maintaining optimal temperature on hot days

F Extra long trouser legs with wind proofing details

“Clothing for ambitious pilots”

Rolf Friedli, Swiss Champion 2013

SIZE CHART GLIDING TROUSERS

FINDING YOUR SIZE

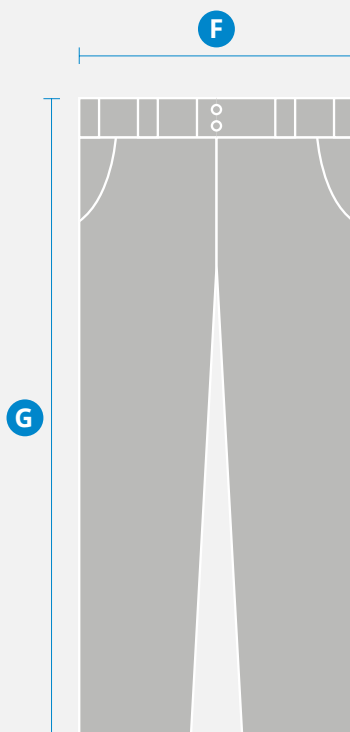

Please note that all measurements are provided in centimeters (cm).

F WAIST

Measure your waist where the waistband of your trousers normally sits. The best way to obtain an accurate measure is to use a pair of well fitting trousers and measure your waistline just above the waistband.

G LEG

The easiest way to determine what length of trousers you need is to measure the length of a comparable pair of trousers of your own. Note: the legs of MILVUS gliding trousers are designed to be 3 – 5 cm longer than for normal trousers. This is to ensure that your legs are completely covered in the reclined gliding position.

SIZE	S	M	L
F WAIST (in cm)	79 – 86	87 – 94	95 – 103
G LEG (in cm)	107	110	113

Are you unsure what size to choose? Do you have other questions about our products? No problem! We're happy to answer your questions by phone, or even better, by email.

MILVUS GLIDING CLOTHING

PORTRAIT GLIDER PILOTS & TEXTILE DESIGNERS

We love the freedom and feeling of soaring. However, amidst our fascination for the sport of gliding something was always missing: suitable clothing.

After countless hours in uncomfortable cotton overalls we therefore decided to redefine gliding clothing. And so, MILVUS was launched. We – that is, enthusiastic gliding pilots and experienced textile designers – have pursued an ambitious goal: to provide gliding pilots clothing that is designed and developed specifically to ensure functionality and comfort during flying.
